

## Sample Amendment 9 email to send to your friends/family/email list

Dear friends,

I am writing to you in support of Amendment 9 on Florida's November 2018 ballot. Amendment 9 would ban drilling for oil and gas in Florida's state waters (3 miles from the shore in the Atlantic and 9 miles in the Gulf). A ban on drilling in state waters would help protect Florida's tourism-based economy, our beaches and wildlife, and our way of life. In addition, passage of Amendment 9 will send a clear message to policy-makers that drilling is not wanted off our coast.

Due to Florida's unique process of getting this initiative on the ballot through the Constitution Revision Commission, officials bundled the offshore drilling proposal with a ban on the use of vaping devices, such as electronic cigarettes, in indoor workplaces.

Amendment 9 is about clean water and clean air for all. But the amendment needs at least 60% voter approval to pass. I am calling on you to please **take the time and vote YES on 9** on your ballot and help protect Florida's beautiful coast.
